S1

Hero — Dark #070809

Eyebrow: ABOUT VACSPL

H1 (two lines, second line in yellow accent):

**Built from
the floor up.**

Subline: Value Added Coating Solutions Pvt. Ltd. was founded by two engineers who spent years learning the coating industry from the inside — selling powder, understanding plants, watching what failed. OptiFinish is what they built when they decided to fix it.

Stats row:

1999	500+	14+	4
Year founded	Installations commissioned	Years as GEMA partner	Office locations

S2

General About — Cream #f1efea

Eyebrow: About VACSPL

Headline (left column):

More than a manufacturer.

A coating company.

Body paragraph 1: Value Added Coating Solutions Pvt. Ltd. — the company behind OptiFinish — designs and manufactures complete powder coating lines, develops proprietary automation systems, and distributes premium liquid coating equipment from GEMA and Durr across India.

Body paragraph 2: Based out of Greater Noida with offices in Gurugram, Rudrapur, and Bengaluru, VACSPL has commissioned 500+ installations across automotive, consumer appliances, steel fabrication, and architectural sectors. Every product — from the spray booth to the curing oven to the conveyor — is built in-house at our Kasma facility and backed by a team that has spent over two decades on factory floors.

3 Value Pills:

1. **Made in India** — Every OptiFinish system is designed and manufactured at our Kasma facility. No re-badging. No imports dressed as local product.
2. **Authorised, not approximated** — Our GEMA and DURR partnerships are formal, authorised, and audited. Customers get the real product, the real warranty, and the real support chain.
3. **Long-term over transactional** — We've worked with many of our customers for over a decade. A plant sale is the beginning of a relationship, not the end of one.

S3

Our Story — Timeline — Dark #070809

Eyebrow: Our Story | *Headline:* 25 years in the making.

Vertical spine timeline. Milestones alternate left/right on desktop, single column on mobile. Each card: yellow year pill, bold title, body paragraph.

1999	Where it began Harish Sharma (MBA, Rohilkhand University) and Lalit Tayal (MBA, Shiva Institute of Management Studies) joined Rapid Coating — a powder coating company — as sales executives. Two graduates from different paths — Harish from Vardhaman Spinning Mills, Lalit from Ayur Herbals — who found their industry on a factory floor in Ghaziabad. Neither left.
2001	First venture Two years into the industry, Harish and Lalit registered Vinayak Agencies — a powder trading company. A small operation, run on deep supplier relationships and the trust they'd built visiting hundreds of plants. The foundation of everything that followed.
2003	First major partnership Vinayak Agencies became a channel partner for Nerolac. A meaningful validation for a young trading company. It gave them access to a world-class product range and cemented their position as a serious regional distributor.
2006	A permanent home The business had outgrown informal setups. Harish and Lalit established a proper head office at Devika Tower, Ghaziabad — the first real base of operations. Structure, credibility, and a team.
2008	Moving north Demand from industrial clusters in Uttarakhand prompted the opening of a branch office in Rudrapur. The market was growing and they were growing with it.
2011	VACSPL and a new identity Value Added Coating Solutions Pvt. Ltd. was formally established — registered, funded, and operational from rented premises in Greater Noida. The same year, they became a GEMA channel partner and opened an office in Gurugram to serve the NCR and Haryana manufacturing belt. This was no longer a trading company. This was a coating systems company.

2015	Building something permanent Phase 1 of the Greater Noida, Kasna facility was built. A manufacturing floor, R&D; space, and assembly area — owned, not rented. The ability to design, fabricate, and test complete powder coating plants under one roof changed everything.
2017-2019	Scaling the floor Phase 2 expansion at Kasna added capacity, headcount, and capability. Testing rigs. Larger fabrication bays. A commissioning area where complete lines are assembled and validated before delivery. The facility became — and remains — the backbone of every OptiFinish system.
2019	The brand is named "OptiFinish" was registered as a trademark. In the same year, VACSPL was recognised as a GEMA OEM vendor in India — authorised to supply GEMA components as part of integrated coating systems manufactured under the OptiFinish name. A milestone that took 20 years to earn.
2022	India's borders, crossed The first export orders for OEM equipment were fulfilled. Coating systems designed and manufactured in Greater Noida, shipped internationally. A proof of quality that no domestic certification could substitute.
2024	Liquid coating, formally added VACSPL became an authorised channel partner for DURR — adding the world's leading liquid coating equipment portfolio to the OptiFinish offering. For customers running liquid lines alongside powder, OptiFinish is now a single-source solution.
2025	South India A Bengaluru office was established, extending VACSPL's direct service reach into South India's growing automotive and appliance manufacturing clusters.
2026	R&D; and Phase 3 The next chapter is underway. Phase 3 expansion at Kasna adds dedicated R&D; infrastructure — test cells, automation development bays, and space for proprietary product development. OptiFinish is building systems that don't exist yet.

S4

Founders — Cream #f1efea

Eyebrow: The Founders | *Headline:* Two people who never stopped being curious about coating.

Harish Sharma — Co-Founder & Director

B.Sc. + MBA, Rohilkhand University. Early career at Vardhaman Spinning Mills before discovering the coating industry in 1999. He has spent the last 25 years working every angle of it — sales, procurement, plant commissioning, and product development. He leads manufacturing strategy and key client relationships at VACSPL.

Lalit Tayal — Co-Founder & Director

B.Sc. + MBA, Shiva Institute of Management Studies. Came to the coating industry from Ayur Herbals. Since 1999, he has built and run the commercial and distribution side of the business — from Vinayak Agencies' first powder sale to DURR's product range landing under the OptiFinish umbrella. He leads business development, partnerships, and regional expansion.

Photo placeholder on each card — swap in real photos when available.

S5

Vinayak Agencies — Dark #070809

Compact dark strip. Name + tagline + description.

Founded in 2001, Vinayak Agencies is the trading arm of the group — supplying industrial powder coatings, liquid paints, touch-up products, PU enamels, and adhesives to manufacturing plants across North India. A Nerolac channel partner since 2003.

Link: </products/vinayak>

S6

CTA — Reuse HomeCTA Component

Reuse exactly as-is. "Get in Touch" button links to /contact.

Implementation

New file:

```
build/optifinish/src/app/about/page.tsx
```

Patterns reused (no new code needed):

- useHeadingAnimation hook — scroll-triggered line reveals
- HomeCTA component — final CTA section
- .tech-kicker, .card-accent-label, .panel-button, .dynamic-button-yellow — from globals.css
- Grid texture inline style pattern — from other dark sections (HeroDark.tsx)
- Navbar isDarkPath already handles /about — no navbar changes needed
